RUBBER MATS AND TECHNICAL FLOOR COVERINGS FOR ICE RINKS

WWW.IDS-FRANCE.NET
Introduction

We are certified in accordance with ISO regulation 9001.
The Direction reiterates its commitment to implement the necessary resources to continue to improve customer satisfaction and the competitiveness of the company, whilst ensuring the respect of safety of each person and the environment. Our company works with certification or standardization bodies (such as LNE, IANESCO, VERITAS, etc.).

IDS products are mainly made of rubber. This natural material is produced from latex secreted by a tree: the Hevea. Rubber is used in two forms:

**Non-recycled natural rubber:**
Natural rubber is produced directly from the transformation of latex. It is very resistant to abrasion and remains flexible even in freezing conditions or subjected to prolonged exposure to U.V. Putting in additives during the manufacturing process makes it possible to obtain rubber that is particularly resistant to oil (nitrile rubber) or more specifically and on request; fire classified rubber, or specific colours.

**Non-recycled natural rubber and recycled natural rubber mix:**
Natural rubber can also be mixed with recycled rubber to reduce its cost.
The technical characteristics of this mixture perform less well than those of non-recycled rubber.

Recycled rubber is a mixture of aggregates of rubber bound by polyurethane elastomer. The rubber grains mainly come from the recycling process. Recycled rubber is quite suitable for glued floor coverings and very thick and non-glued slabs. It is non-slip, robust and insulates against cold and noise.

Make the right choice.

To advise you as well as possible in the choice of your gratings or floorings, IDS has devised a simple system of signs to help you quickly identify the characteristics of each of our products.

To choose the right product for you, first of all, you need to think about the use you will make of it and what will be demanded of it.
On what kind of floor will you lay the gratings or covering? Will it be indoors or outdoors? Are you going to glue it or lay it loose? Slabs or rolls? Do you need a particular fire classification? Are you subject to disabled accessibility standards? What will be the intensity of the traffic? Do you need particular resistance to oil, chemicals, U.V, freezing or slipping?

The answers to these questions and our icons will enable you to choose the most suitable product for your needs.

In order to preserve your customer’s health and yours, IDS commits itself to the respect of the REACH regulation by banishing from its products all the substances harmful for the man and for the environment.
We have made the choice to only offer «SVHC Free» products in order to guarantee the highest level of compliance to the REACH regulation.

Member of amfori, ID Group is committed to respect principles of open and sustainable trade (respect for the labour code, business ethics, non-use of child labour, non-discrimination, environmental protection ...) We improve the social performance of our supply chain via amfori BSCI. For more information, visit www.amfori.org

CLIP 18 SLABS
Ultra-rugged interlocking rubber slabs

**Composition:** 100% non-recycled natural rubber

**Advantages:**
- Loose laying (no gluing)
- Special slabs for skating rinks
- Extremely resistant to ice skates
- Resilient to ice resurfacing machine passages
- Anti-slip R9
- The grooved inner surface drains humidity
- Heat and sound insulation
- Easy to lay with the interlocking
- Cleaning with single disc machine

**Colours:** black - Other colours on request

M75 SLABS
Special interlocking rubber slabs for skating rinks

Composition: 100% non-recycled natural rubber

Advantages:
- Loose laying (no gluing)
- Special slabs for skating rinks
- Resistant to ice skates
- Anti-slip R9
- Heat and sound insulation
- Easy to lay with the interlocking
- High resistance to abrasion
- Cleaning with single disc machine

SOLID SPORT
Rubber slabs for ice rinks

Composition: 100% rubber

Advantages:
• High resistance to ice skates
• Anti-slip R9
• Robust and not sensitive to water
• Aesthetics and decorative
• Bi-layers slabs: shock absorbent lower layer and highly wear resistant top layer
• Heat and sound insulation
• Cleaning with single disc machine

Layout:
Fully glued with bi-components polyurethane glue

+ info:
• Other thickness on request
• Custom colours upon request (mini 150 m²)

ID ICE
Interlocking rubber slabs for ice rinks

Composition: Recycled rubber underlay with 3 types of surface: 8110, Sportneige or Délineige.

Advantages:
- High resistance to ice skates
- Robust and not sensitive to water
- Aesthetics and decorative
- Bi-layers slabs: shock absorbent lower layer and highly wear resistant top layer
- Heat and sound insulation
- Cleaning with single disc machine

Laying:
The slabs rest on the ground and are tied together with dowels.

+ info: Other thickness on request

SPORTNEIGE / ID NEIGE
Sports floor covering

Composition: 85% recycled black rubber, 15% coloured EPDM grains

Advantages:
- Robust and not sensitive to water
- Aesthetics and decorative
- Absorbs shocks
- Heat and sound insulation
- Cleaning with single disc machine

Layout:
Fully glued with bi-components polyurethane glue

+ info: Other thickness on request

POLYURETHANE GLUE
Bi-components polyurethane glue

Composition:
Polyurethane (5.0 kg) + hardener (0.7 kg)

Applications:
For all indoor or outdoor rubber floor coverings in slabs or rolls, carpets and synthetic turf.

Advantages:
- Suitable for gluing to many supports and for coatings such as concrete and breeze blocks.
- Recommended for intensive use.
- May be subject to wide temperature variations by its flexibility.

Layout:
Polymerization time at 5°C minimum: after 24 hours for opening to foot traffic, after 48 to 72 hours for intense traffic.

Approximate glue consumption
Sportneige / ID Neige
1 to 1,2 kg/m²
RUBBER GRATINGS M25
Ultra-tough grating, specially designed to meet disabled standards

Composition: 100% non-recycled natural rubber

Advantages:
- Model conforming to the disabled standard
- LOGC940024A
- Highly anti-slip: fine edges over the entire surface
- Very robust thanks to its density
- Perfect for ice skates racks
- Allows to walk barefoot without getting wet
- Upper face allowing total water and snow drainage
- Resistant to ice skates cuts
- Long lifetime
- Bevelled edges to facilitate access (M2606)

Colours: black - Other colours on request

+ info:
- Custom cutting
- Cfl-S1fire classification upon request

**RINKTEX**
*Multi-purpose floor protection*

**Composition:** 100% needled synthetic felt

**Application**  Rinktex allows you to convert your ice rink into a multi-purpose venue while protecting the ice. Concerts, horses shows, boxing match, handball, meetings...

**Advantages**
- Insulate and protect the ice (no melting)
- Do not stick to the ice
- Quick and easy to install (2h for 4 pers.)
- Reusable and durable
- Great return on investment
- Light and flexible
- Thermal insulation
- Great wear resistance
- Can be cleaned with a vacuum cleaner

**Colours:**
Grey (other colours on request)
Also available in double sided (2 different colours)

1 ice rink = 15 rolls 4x30m

- Rolls are placed side by side
- Cutting round corners
TAPILOGO
The professionnal grade personalized mat

Composition: 100% polyamide fibre on 100% nitrile rubber soles

Advantages:
- Extremely sturdy and efficient
- Anti-slip soles
- Long lasting colours thanks to deep ink projection inside fibres (jet print technic)
- Excellent oil resistance
- Reinforced edges
- Suitable for industrial laundry
- Possibility to use 16 different colours on your Jet Print TAPILOGO mat

Colours: see swatch

+ Info:
