RUBBER MAT AND TECHNICAL FLOOR COVERINGS FOR SKI RESORTS
Introduction

The IDS products consist mainly of rubber. This natural material is produced from latex secreted by a tree: the Hevea. Rubber is used in two forms:

Non-recycled natural rubber:
Natural rubber is produced directly from the transformation of latex. It is very resistant to abrasion and remains flexible even in freezing conditions or subjected to prolonged exposure to U.V. Putting in additives during the manufacturing process makes it possible to obtain rubber that is particularly resistant to oil (nitrile rubber) or more specifically and on request; fire classified rubber, or specific colours.

Non-recycled natural rubber and recycled natural rubber mix :
Natural rubber can also be mixed with recycled rubber to reduce its cost.
The technical characteristics of this mixture perform less well than those of non-recycled rubber.

Recycled rubber is a mixture of aggregates of rubber bound by polyurethane elastomer. The rubber grains mainly come from the recycling process. Recycled rubber is quite suitable for glued floor coverings and very thick and non-glued slabs. It is non-slip, robust and insulates against cold and noise.

Make the right choice of your product.

To advise you as well as possible in the choice of your gratings or flooring, IDS has devised a simple system of signs to help you identify the characteristics of each of our products quickly.

To choose the right product for you, you need first of all to think about the use you will make of it and what will be demanded of it.
On what kind of floor will you lay the gratings or covering? Will it be indoors or outdoors? Are you going to glue it or lay it loose? Slabs or rolls? Do you need a particular fire classification? Are you subject to disabled accessibility standards? What will be the intensity of the traffic? Do you need particular resistance to oil, chemicals, U.V, freezing or slipping?

The answers to these questions and our icons will enable you to choose the most suitable product for your needs.

ISO 9001:2015
BUREAU VERITAS
Certification

Management has been involved in a Quality process for over 10 years.

Member of amfori, the leading global business association for open and sustainable trade. We improve the social performance of our supply chain via amfori BSCI.
For more information, visit www.amfori.org

REACH REGULATION
IDS commits itself to the respect of the REACH regulation by banishing from its products all the substances harmful for the man and for the environment.

The answers to these questions and our icons will enable you to choose the most suitable product for your needs.

After having implemented a management system that complies with the requirements of the ISO 9001 version 2015 standard, we note that this improves our service to our customers by respecting their requirements. This quality approach has also helped us to get closer to the certification or standardization institutions (such as LNE, Veritas…), which is very positive for the sustainability of our products and our activities.

The Management reiterates its commitment provide the necessary resources to continue to improve the satisfaction of its customers and the competitiveness of the company, while ensuring respect for the safety of each and the environment.

Management has been involved in a Quality process for over 10 years.

Member of amfori, the leading global business association for open and sustainable trade. We improve the social performance of our supply chain via amfori BSCI.

Product advantages
Disabled standard
Draining
Use up to -40°C
UV resistant
100% rubber

Maintenance
High pressure washing
Water jet washing
Cleaning by single brush
Applications:
• ski lift stations
• access ramps and stairways
• operating units for ski lifts
• shops, restaurants, tourist offices, etc.

Advantages
• Draining: ideal on open floors (metal gratings). Snow and water pass through.
• Non-slip: comfort and security for users, especially wearing ski boots
• Frost and UV resistant
• Soundproof
• Resistant to treading by ski boots
• High pressure washing

+ info :
• Specific fire classifications on request
• Different colours on request
**RUBBER GRATINGS M25 / M26**  
Ultra-tough grating, designed to meet disabled standards

**Composition:** 100% non-recycled natural rubber

**Advantages:**
- Model conforming to the disabled standard LOGC940024A (Holes diameter must be less than 20 mm)
- Highly anti-slip: fine edges over the entire surface
- Edges bevelled to facilitate access (M2606)
- Very robust thanks to its density
- Upper face for total drainage of the water and snow
- Resistance to cuts from metal gratings
- Long service life

**Colour:** black - Other colours on request

**+ info:** custom cutting

RUBBER GRATINGS M69+ / M22
Ultra-rugged gratings

Composition: 100% non-recycled natural rubber

Advantages:
- Very robust thanks to its density
- Large reinforced cells for total drainage of the water and snow
- Very anti-slip via its protruding cells
- Resistance to cuts from metal gratings
- Long service life

Colour: black - Other colours on request

ECONOMICAL RUBBER GRATINGS

Rubber grating

Composition: 100% natural rubber
(recycled and non-recycled natural rubber)

Advantages:
- Economical
- Model M67 conforming to the disabled standard LOGC940024A (Holes diameter must be less than 20 mm)
- Lightweight: easy to put in place
- Very anti-slip

Colour: black - Other colours on request

RUBBER GRATINGS MR12BB
The rubber gratings with bevelled edges to disabled standards

Composition: 100% natural rubber (recycled and non-recycled natural rubber)

Advantages:
• Model conforming to the disabled standard LOGC940024A (Holes diameter must be less than 20 mm)
• Very thin with bevelled edges to reduce the risk of tripping, and to facilitate the passage of wheelchairs
• Non-slip and draining
• Very good ground holding by its sole with suction cups
• Lightweight and easy to fit
• Robust

Colour: black - Other colours on request

Reference Dimensions Thickness Weight Fire classification
-- -- -- -- --
MR12BB90150 90 x 150 cm 10 mm 9,0 kg -
MR12BB120180 120 x 180 cm 10 mm 17,0 kg -
Composition: 100% natural rubber (recycled and non-recycled natural rubber)

Advantages:
- The only grating on a roll
- Model conforming to the disabled standard LOGC940024A (Holes diameter must be less than 20 mm)
- Very thin to reduce the risk of tripping, and to facilitate the passage of wheelchairs
- Non-slip and draining
- Lightweight and easy to fit
- Laying on a hard floor

Colour: black - Other colours on request

+ Info: custom cutting

RUBBER SLABS

Applications:
- ski lift stations
- skating rinks
- access ramps and stairways
- kiosks and ski lift areas
- locker rooms, skis storage areas, etc
- shops, restaurants, tourist offices, etc.

Advantages:
- Snap slabs (loose laying) no gluing
- Non-slip: comfort and security for users, especially wearing ski boots
- Special slabs for skating rinks, high resistance to ice skates
- Heat and sound insulation
- Resistant to treading by ski boots
- Self-weighted
- Easy laying and relocation via the interlocking
- Draining under surface
- Easy to clean
- High pressure washing

+ info :
- Different colours on request
CLIP 18 SLABS
Ultra-rugged interlocking rubber slabs

Composition: 100% non-recycled natural rubber

Advantages:
- Loose laying (no gluing)
- Special slabs for skating rinks, high resistance to ice skates
- Resistant to treading by ski boots
- Very anti-slip
- Grooved under surface draining the humidity
- Heat and sound insulation
- Easy to lay with the interlocking
- Cleaning with single disk machine

RECYCLED RUBBER FLOOR COATINGS
AND RUBBER ROLLERS

Applications:
- kiosks and ski lift areas
- skating rinks
- access ramps and stairways
- locker rooms, skis storage areas, etc.
- shops, restaurants, tourist offices, etc.

Advantages:
- Anti-slip
- Flexible
- Sound and heat insulation
- High resistance to abrasion
- Easy cutting
- Very decorative
- Large choice of colours and thicknesses
**Composition:**
Speckled Délineige: 35% EPDM rubber (black) 65% EPDM (coloured grain)
Plain colour Délineige: 100% coloured EPDM

**Advantages:**
- Robust and insensitive to water
- High resistance to wear, ageing and UV.
- Excellent resistance to stresses and mechanical influences
- Good looking and decorative
- Absorbs shocks
- Heat and sound insulation
- Cleaning with single disk machine

**Laying:** Glued flat with polyurethane glue.

**Colour:** Speckled or plain (see colour chart)

**Plain Délineige (on request)**

POLYURETHANE GLUE
Two-component polyurethane glue

Composition:
Polyurethane (5.0 kg) + hardener (0.7 kg)
or a kit of 5.7 kg

Applications:
For all indoor or outdoor rubber floor coverings in slabs or rolls, carpets and synthetic turf.

Advantages:
• Suitable for gluing to many supports and for coatings such as concrete and breeze blocks.
• Recommended for intensive use.
• May be subject to wide temperature variations by its flexibility

Laying:
Polymerization time at 5°C minimum: after 24 hours for opening to foot traffic, after 48 to 72 hours for intense traffic.

**ASTROSKI**
Lawn look scraping mat

**Composition:** 100% polyethylene

**Application:**
Enterance mats for heavy traffic, ski lift boarding areas, beginner spaces, etc.

**Advantages:**
- Resistant: ideal for outside for all types of climates
- Skis slide on it
- 100% recyclable
- Draining
- Easy to clean, always keep a clean look
- Anti-slip sole

**Laying:**
Glued flat with polyurethane glue.

**Colour:** green - red / brown / white (Astroski)

TAPILOGO
The professionnal grade personalized mat

Composition: 100% polyamide fiber on 100% nitrile rubber soles

Advantages:
- Extremely sturdy and efficient
- Anti-slip soles
- Long lasting colours thanks to deep ink projection inside fibers (jet print technic)
- Excellent oil resistance
- Reinforced edges
- Suitable for industrial laundry
- Possibility to use 16 different colours on your Jet Print TAPILOGO mat

Colours: see swatch

+ Info:
For optimum quality, please send us a vector file (AI, EPS, PDF or SVG) CMYK. If not, send us a high-definition JPG file.
